

GITTERPAK® INDUSTRIAL

HDB1208 x 600

The new GitterPak with a height of 600 mm offers ergonomic benefits when handling heavy parts, improves accessibility, enables more efficient stacking and storage concepts, reduces material usage and production costs, and increases transport efficiency through better space utilization. Designed in European dimensions and produced in Europe, the HDB1208 GitterPak with a height of 600 mm holds up to 900 kg. As part of the ORBIS line of FLCs, the GitterPak (Model HDB1208) offers logistics advantages, warehouse cost savings, and an environmentally friendly alternative to steel tubs, wood pallets and crates.

- Robust FLC with European footprint 1208 x 600 mm
- 1:1 replacement for steel gitter boxes
- Weight capacity of 900 kg
- Reusable and recyclable
- Structural-foam molded sidewalls
- High-density polyethylene
- All-plastic construction eliminates the risk of rust
- All-plastic picture frame bottom base
- Stacks securely when fully loaded
- Custom protective dunnage available
- Designed to support PPWR compliance requirements
