

## PRODUCT SPEC SHEET

# 4048 RACKSTAR® II PALLET

Engineered using advanced manufacturing techniques, the Rackstar II Rackable pallet features an innovative reinforcement structure designed to meet a wide range of material handling needs. Its highly impact-resistant design preserves structural integrity across diverse racking and conveying environments.

- Consistent weight for accurate transportation costs
- Smooth, all plastic construction protects product
- Improves workplace safety with smooth design and stable stackability
- Unsupported rack capacity of up to 3,000 pounds
- Resists cold flow or “creep,” ensuring long-term reliability
- Injection molded for superior impact resistance and reduced deflection
- Removable / repairable stringers or full frame bottom available
- Optional Accessories:
  - Deck and fork tine grommets
  - Inboard and outboard lip
  - ID plates
  - Textured surface
