Introducing NXO4815-11: The Latest Addition to ORBIS's NXO StakPak® Product Line
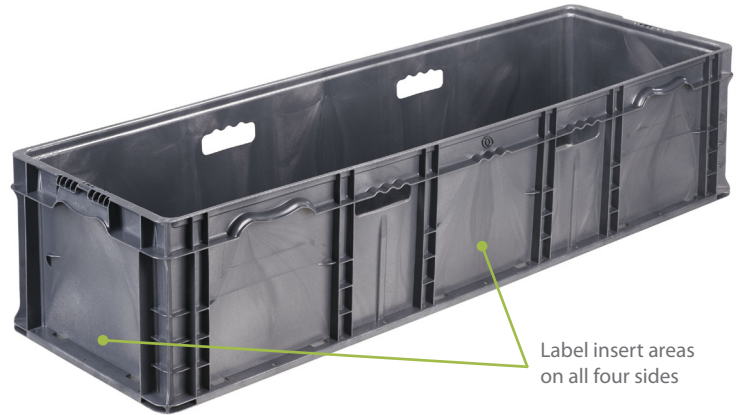

ORBIS' NXO4815-11 is a versatile container designed for the automotive and industrial sectors, ideal for just-in-time (JIT) applications. It integrates shipping, storage, and work-in-process operations, optimizing efficiency and reducing handling costs throughout the supply chain.

With robust construction that withstands manufacturing and transportation demands, this container boosts operational workflows while ensuring durability. At the end of its life, all ORBIS StakPaks® are fully recyclable, supporting environmental sustainability and minimizing waste.

For customized packaging, StakPaks can be combined with ORBIShield® industrial fabric dunnage to create tailored systems that enhance protection and shipping efficiency for various product shapes and sizes, adapting to changing needs.

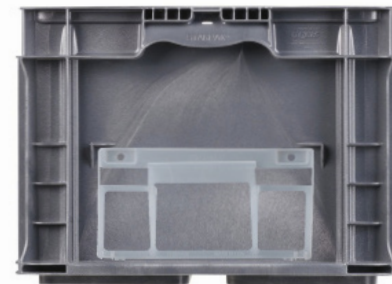

Label insert areas on all four sides

BENEFITS

■ Unique insertable texture on both long and short sides enhances aesthetics and functionality.
■ Robust bottom reinforcement ensures durability and stability.
■ Continuous vertical ribbing provides extra structural integrity for heavy use.
■ Sleek design removes unnecessary components for easier handling and storage.
■ Strategically placed handle holes improve grip for comfortable transportation.
■ Optional drain holes facilitate drainage and prevent water accumulation.
■ Insertable logo area allows for personalized branding.
■ StakPak® logo on the handle enhances brand visibility.

Optional handle holes for better grip

Reinforced bottom (R) is available

Optional cardholders or used as label insert area on both short sides
