

ORBIS INTRODUCES THE NEW RCNXO LIDS

The RCNXO Lids represent ORBIS's latest innovation, specifically designed to meet the evolving demands of the automotive industry.

These lids were developed to help protect parts and maintain tight cleanliness requirements. Featuring a new ribbing structure to prevent warp and optional removable locking tabs for streamlined automation, our RCNXO Lids provide a key piece in the total solution our customers look for.

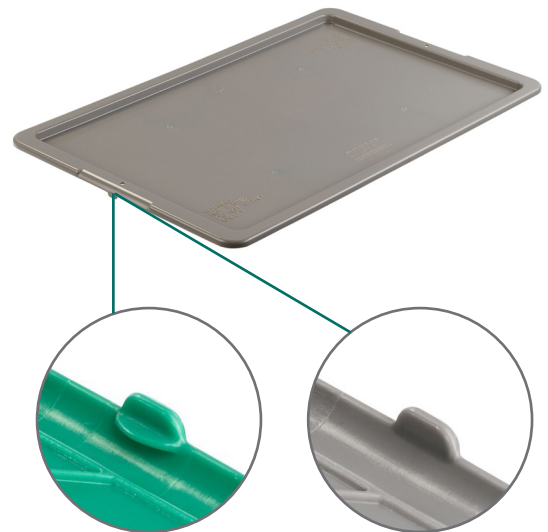

RCNXO2415

KEY BENEFITS:

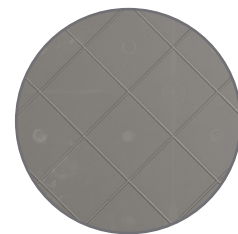

- Protects parts in shipping
- Helps keep parts clean and free of contamination
- Lowers environmental impact through sustainable manufacturing.
- Available in ESD material

PRODUCT FEATURES:

- **Ribbing Structure:** Enhances warp resistance and maintains structural integrity.
- **Locking Tab Option:** Customizable with insertable locking tabs for diverse applications.
- **Additional Clearance:** Prevents sticking on tote bottoms for smooth operation.
- **Available in three sizes:** RCNXO2415, RCNXO2422, and RCNXO1215
