PRODUCT SPEC SHEET

4048 XPRESSPAL® GROCERY PALLET

ORBIS' 40 x 48 XPRESSPAL® grocery pallet is designed for shipping finished goods from distribution centers to retail in the grocery supply chain. It is an all plastic, one-piece construction and designed for harsh and rugged handling. Round, open legs ensure compatibility with similar pallets in the market.

The fully hygienic, flow-through design is easily cleanable. In addition, permanent texturing in the top deck helps prevent loads from slipping. ORBIS plastic pallets are fully recyclable at the end of its service life.

Plastic pallets are an economic, environmental and efficient alternative to wood pallets or skids. With the most comprehensive selection of styles and footprints, ORBIS is North America's leader in plastic pallets.

- High strength-to-weight ratio
- One-piece, high-pressure injection molded
- Fully hygienic, flow-through design
- Molded-in texture to minimize load shifting
- Round, open legs for maximum impact performance
- Ergonomic hand holes for ease of manual movement
- Improved return ratios compared to wood
- Optional deck grommets available
